۵	One of the greatest Englishmen who ever lived was Isaac Newton. Few men of that time were greater or wiser than Newton but he often forgot small things.  One morning Newton got up very early because he was working on a very difficult problem. He did not leave the problem to go to breakfast.  But his servant thought Newton needed food. Therefore, she went to his room with a	۱۱
	pan of water and an egg.  She wanted to boil the egg and stay with Newton until he ate it. But he did not want to see anybody and said, "You can leave the egg with me. I'll boil it."  The servant put the egg on the table near Newton's watch and said: "You must boil it for five minutes. Then it will be ready to eat."  The servant left the room, but she was afraid that Newton might forget to eat the egg.  She returned about an hour later and found Newton standing by the fire. The watch was boiling in the pan and Newton was standing near it with the egg in his hand!	
	Questions: 36. Why did Newton get up early? 37. Where did the servant put the egg? 38. Where was Newton's watch? 39. When did she return to his room? 40. What did she see there?
