	24)mate	erial 25) quality	26) nationality	27)size		
	Reading I:Read the following pa	ssages and answer	the questions.			
	Text Bacteria and viruses are two important types of microbes. Bacteria are really important microbes. They are very small. They have only one cell. Bacteria can live in any area of the earth. They aren't all bad; in fact you couldn't live without some bacteria! Viruses are among the smallest microbes on the earth, even smaller than bacteria. They are different from bacteria because they cannot live on their own. Viruses need to be inside a living cell to live and grow. There aren't many good things about viruses .They usually attack your body and make you sick!					
4	Bacteria and viruses are to microbes. They are very the earth. They aren't all Viruses are among the sn are different from bacteri inside a living cell to live	small.
